

A Decade of SWOT Teamwork

Data contributors since 2004

SWOT's global network of volunteer data providers is the lifeblood of the SWOT program. As shown in the infographic on pp. 38–39, SWOT's database now hosts information from 3,271 nesting sites, 525 satellite tracked turtles, and 130 countries and territories. Here we recognize the individuals and institutions who have contributed data to SWOT since 2004.
